#### DIRECTORATE OF COLLECTION

#### (U) Organization and Functions

Rapidly-moving world events and decreased manuover authorizations necessitated a reorganization within the Suman Resources Branch. The requirement to have a collection control capability immediately available resulted in the initiation of the Staff Duty Section located within the Indications Center. One collection-trained officer is always available to insure that proper intelligence collection action is implemented. The Collections Operations Section was activated to supervise and monitor all human source collection accomplished by AFCIN-controlled assets and to assist the activities conducted by air component commanders and by certain specified commands. The Space Track Section, which had been activated during an earlier period, was slightly enlarged to enable it to perform adequately the mission of monitoring intelligence collection accomplished through this media.

(Uncl) The Staff Duty Section was activated to provide a quick reaction collection capability during non-duty hours for the Director of Collection. The wisdom of creating this new activity became apparent during the Japanese unrest attending President Eisenhower's proposed trip to Japan. Other events which have required special and immediate reaction to intelligence collection opportunities are the Cuban situation and the Soviet missile test activity which is programmed to fire several long-range missiles into the

racific area subsequent to 1 July 1960.

)

The Electronics Division acted as staff agency for the Air Force on the Joint Staff in preparing the implementing directives for JCS 1051/259, assemblishment, Maintenance and Operation of the Special Communications Security Center (SCSC) at the Alternate Joint Communications Center (AJCC). Under JCS 1051/269, the responsibility for operation and maintenance of the SCSC/AJCC was transferred from the Army to J-2, the point Staff, with joint manning to be provided by the three Services.

In order to improve the communications support to the National Indications Center and the Air Force Intelligence Warning Center, the Air Force Security Service Office (AFSSO), reacquarters USAF, was relocated from Annex #3 to BC-950, the rentagon. A modern major communications center was activated on an emergency basis, collocated between the National Indications Center and the Air Force Intelligence Warning Center. This communications center became operational on 12 May 1960, eleven (11) months after final approval at Meadquarters USAF. This communications center has 32 direct, allocated, secure, duplex circuits to USID members, Air Force Intelligence Warning Center, and USAFSS Relay/Processing Centers which provide a communicative quick-reaction capability to intelligence on a plateau above all other intelligence activities.

(Uncl) During the period 1 January through 30 June 1959, the Poreign Liaison Group was redesignated the International Liaison Division. The reorganization constituted a realignment of functions, a regrouping of activities and alteration of titles. The Protocol Section became the Liaison Branch and the Hilitary Information Section and the Clearance Section were combined to become the Information Branch. The Information Branch was increased in personnel by one officer and one civilian and assumed a new duty as follows:

The function of approving disclosures of classified information abroad by USAF military and civilian personnel as well as Air Force contractors. This function was transferred to the Information Branch from the Foreign Folicy Disclosure Section (AFCIN-P1B).

(Uncl) The Liaison Branch has operated understrength by an average of two officers and two Civil Service employees during this reporting period.

# (U) USAF Intelligence Collection Requirements Program

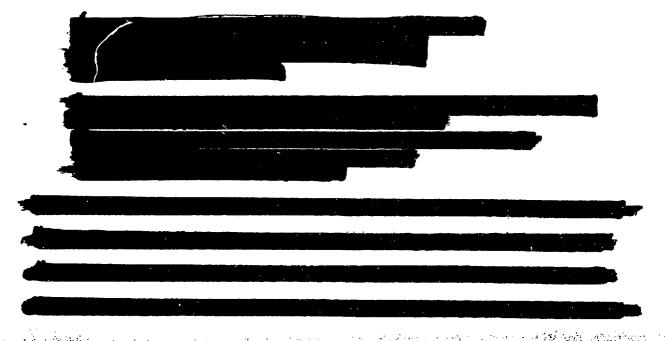

Development of the new Air Intelligence Requirements Frogram was completed between January and June 1960. As part of this program, Air Force Manual 200-1, Intelligence Collection Manual, was published on 31 Hay 1960 to supersede the former USAF Intelligence Collection Instructions (ICI) document of June 1954. A revised form was printed to replace

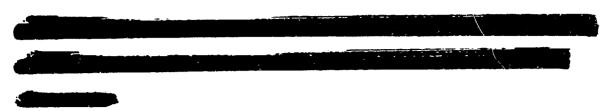

The second of th

the former Specific Request for Information (SRI) form, and new procedures went into effect to validate Short form Air Intelligence Requirements (STAIR) in order to eliminate duplication of collection requirements to be levied on air intelligence collectors. The AFCIN Collection Requirements doard provided extensive cooperation, enabling completion of the new program during the period.

#### (U) Intelligence Collection Requirements Documents

hasic air intelligence collection requirements published by this headquarters were superseded by a series of Priority Air Intelligence Requirements (FAIR) documents consolidated by subject matter and by a series of Current Air Intelligence requirements (CAIR) documents compiled on a geographic basis. Both series were completed and the following documents were initially published during the period.

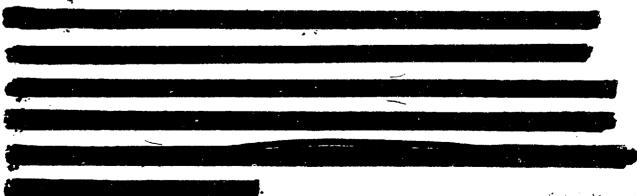

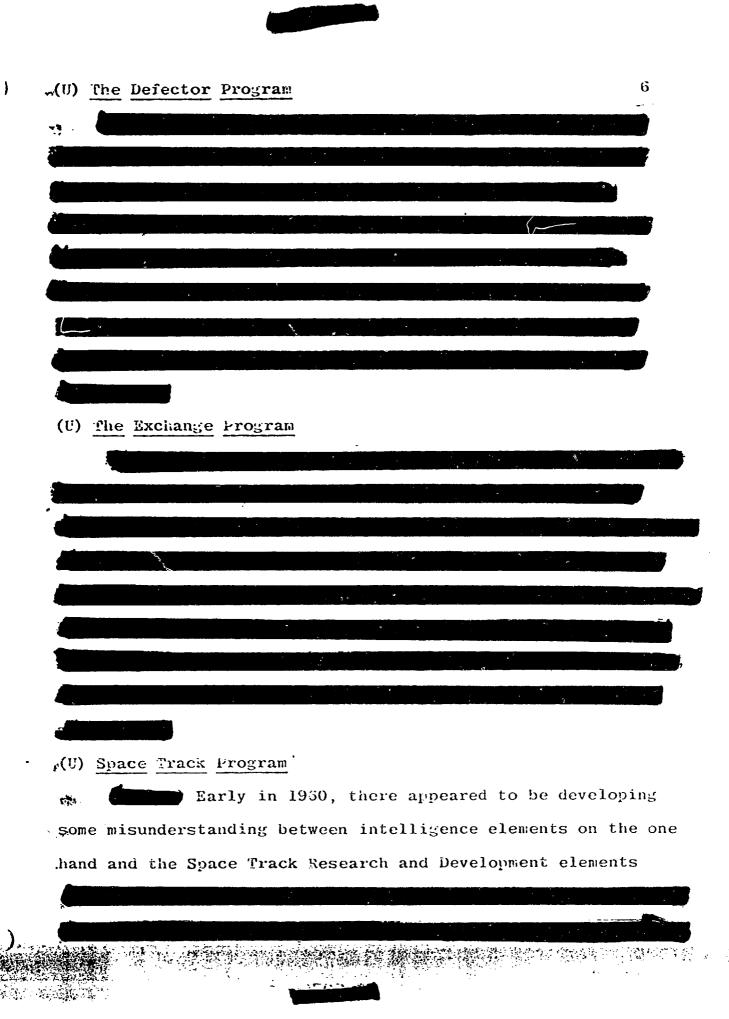

#### (!) Collection Evaluation Program

of potentials therein, and a determination as to the direction of these resources against highest priority requirements were accomplished with a view to improvement of the collection posture. An initial study of basic procedures to be used for a new Collection Evaluation program was underway for presentation to the Data Processing Steering Group and formulation of a Collection Evaluation Board was under consideration.

# (U) Other Lequirements Activities

Iniority collection requirements were portrayed in the new Collection Operations Planning Doom for the information of visiting intelligence officials and for planning and management of air intelligence collection operations. Glaison with the Air Mesearch and Development Command was maintained on intelligence masters and equipment.

on the other as to whether or not valid intelligence requirements had ever really been levied upon, and accepted by, Air "esearch and Development Command (ANDC) and Space Track. Discussions between Assistant Chief of Staff, Intelligence, and Deputy Chief of Staff, Intelligence, Eq AFDC, indicated that the use of the word "requirements" had been the basic cause of misunderstanding between Intelligence and ARDC elements. Although intelligence information requirements had been given to and accepted by ARDC, developmental or operational requirements had not, until Larch 1960, been levied on AMDC through the established channels. DCS/Intelligence, ARDC, pointed out that the Qualitative Operational Requirement (WOR) was the means by which intelligence could place developmental requirements on ARDC. Two such OBs were approved by the Assistant Chief of Staff, Intelligence, and forwarded to the Directorate of Operational Requirements during April 1960.

}

(J) Activities of United States Intelligence Doard Space Surveillance Intelligence Support Committee (USIE SSISC)

The ACS/I continued to provide chairmanship of the ISIB SSISC. The committee was instrumental in arranging for Advanced Research Projects Agency to hold a meeting of National.

Space Surveillance Control Center (NSSCC) (Space Track) and Naval Research Lab (East-West Fence) personnel, on 12 February 1930

The meeting, which the SSISC Chairman and Secretary attended, resulted in an agreement between Haval Tesearch Lab (NRL) and NSSCC for transmittal of data, which was considered satisfactory, for immediate fature, so all concerned.

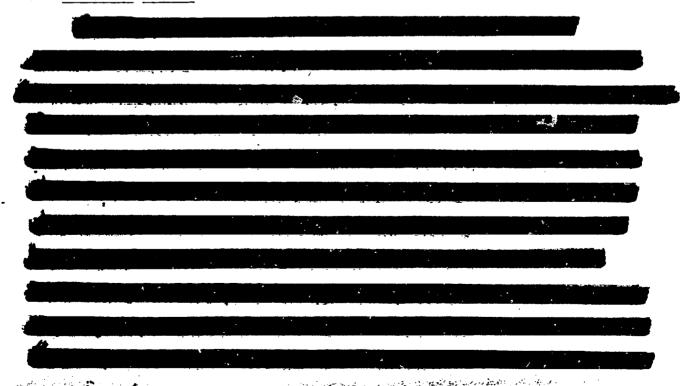

a committee charter and preparing an emergency plan during the first part of 1936, the committee at its 3 some 19-3 meeting work are initial steps toward implementing a maximum effort to fulfill the national space surveillance intelligence requirements. With USIS approval, on 24 hay 1969, of priorities for the national space surveillance requirements of March 1959, the committee at its 3 June 1960 meeting, decided upon preliminary courses of action it would pursue to assure maximum effort by all concerned to fulfill these requirements. Objectives established included: preparation of a more detailed set of requirements, widest possible disserination of the approved documents, and coordination of above actions with other CSIS committees concerned with activities applicable to fulfillment of these requirements.

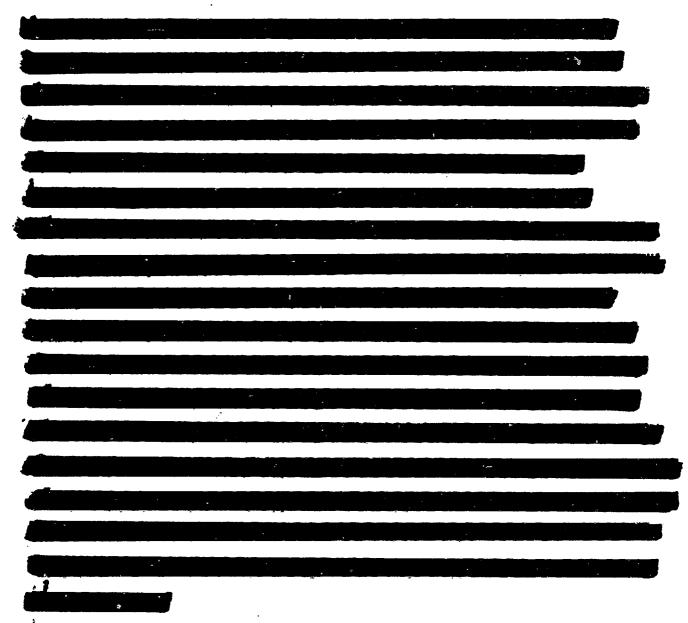

# (U) Aerial Fhoto Requirements

The recent conversion of photo requirements to

International Tusiness Fachine cards resulted in minimum effort in consolidaring and forwardin, lists to organizations where a collection capability. Fonitoring of command cards for correct accuracy prior to consolidation remains a problem. This problem while we solved in part of re-adjusting dates of succission of I-H cards in order that a current publication of the Carget Data Inventory can be used for casic reference taterial. Tasic planning is underway for conversion in this Meadquarters of the THE cards to magnetic tape in order to utilize computer capability to spectium basic consolidation of command cards and summarization of the master deck of cards. In addition, tape conversion will be compatible with equipment used in new collection systems.

#### (U) Project SANOS

# (U) Equipment

)

In January 1960, the Air Force requested an equipment review meeting be conducted. Purpose of this meeting was to evaluate the current status of the special equipment procurement program. It was determined at this meeting that the needs of these equipments were valid and the program would continue as originally conceived. The

delivery schedules and the remaining MED aspects of the Frogram were re-affirmed. Isolated problems concerning Contract overruns were discussed and have been subsequently discharged. At this time, the program is approximately 90% completed with final delivery of the last items to occur this Mall.

# (U) Liaison Branch, International Gialson Division

- (Uncl) During the period (January 00 June 1950, the Biaison Branch was responsible for the following tours:
- Secretary of Defense Fours:
- The Right Honorable HAROLD WATKINSON Minister of Defense, Great Britain
- \* 30 May through 7 June 1930
- Dr. Franz-Josef STRAUSS
   Minister of Defense, Federal Republic of Germany
   7 20 June 1950
- ♦ Secretary of the Air Force Your:
- The right Monorable George . WARD, M.A. Secretary of State for Air, Inited Kingdom 6 15 January 1980
- Chief of Staff fours:
- General Chin-shang CHEN, Commander-in-Chief
   Chinese Air Force, 28 February thru 17 March 1960

Lt General Eugenio de FUUTOS Diesne Chief of Staff, Spanish Air Force 6 - 20 March 1980

Major General Forsten R. PAFF Chief of Staff Designate, Yoyal Swedish air Force 12 - 30 March 1960

Brigadier General Rafael ANDRADE Ochoa Commanding General, Ecuadorian Air Force 20 March through 3 April 1950 Brigadier General Conrado A. SAEZ Commander, Uruguayan Air Morce S = 17 April 1980

Air Vice Harshal Halcom F. CALDER Chief of Staff, Loyal New Zealand Air Force 30 April through 14 May 1980

# Joint Chiefs of Staff Tours:

Visit of Air Marshal for Aviation VERSHININ of USSM was completely planned and ready for execution when Vershinin cancelled.

Assistant for Mutual Security Tours (Military Assistance Program)

Major General Hatsuhiko WATANADE Commandant, 2nd Technical School (Communications) Japan Air Self Defense Force 17 - 31 January 1950

Major General Alfredo Ramirez LAVIN Deputy Chief of Staff, Materiel, Chilean Air Force 10 - 21 April 1980

Major General Hans Jorgen PAGH Chief of Staff, Hoyal Danish Air Force 23 April through 9 May 1960

Major General Bernard G. CHALLE Commander, Second Air Region, French Air Force 7 - 21 Nay 1960

Major General Nino FASTI Vice Chief of Staff, Italian Air Force 5 - 9 June 1950

' (Uncl) During the reporting period the Liaison Branch was responsible for the following non-scheduled tours:

Cranwell Cadets - Great Britain

Surgeon General Tour

His Excellency, the Ambassador of Libya, and Mrs. FEKINI visited ratrick AFB, Florida, for an unclassified briefing on 15 March.

The ACA KHAN, Pakistan, requested an informal visit to WADD, Wright-Patterson AFB, on 13 June. General Wray was escort officer.

Air Marshal Bir Frederick SCHERGER, M.B.E., C.B. A.F.C., Chief of Staff, Royal Australian Air Porce.

(Uncl) During the reporting period the following tours were participated in by the Liaison Tranca but sponsored by another service or agency:

#### White House:

President de Gaulle, France

#### State Department:

King and Queen of Nepal

King and ween of Thailand

### Office, Secretary of Defense:

Canadian National Defense College Members

Major General (Crown Prince) Mohammed of Jordan Mational Defense College, Taiwan

Colonel Al-Shukaimary, Saudi Arabia

Secretary of National Defense AVILES, Mexico

North Atlantic Treaty Organization Intra-Structure Committee

# International Cooperation Administration:

Minister of Education, Iraq

#### Army

Commodore Congwoo LEE, Korea

Canadian Army Staff College

Major General Kyung Nok CHOI, Commandant, National Defense College, Korea Colonel Hamad AL-SHUKAIMARY, Saudi Arabia Deputy Chief of Staff for Logistics, Army

General NE WIN, Chief of Staff, Burma Defense Services

#### Navy

Vice Admiral Young Woon LEE, Korea

(Uncl) The following Special Events were the responsibility of the Liaison Branch:

Hospitality Tour: For the semi-annual Mospitality Tour, sixteen Air Attaches and twelve Assistant Air Attaches accredited to the United States Air Force visited the Arnold Engineering Development Center, Tullahoma, Tennessee; New Orleans, Louisiana; the Aerospace Medical Center, Brooks Air Force Base, Texas; Beech Aircraft Corporation and Cessna Aircraft Company, Wichita, Kansas; McDonnell Aircraft Corporation, St. Louis, Missouri; and Detroit, Michigan.

<u>Farewell Dinner</u>: The Assistant Chief of Staff, Intelligence, was host at a dinner at Bolling Air Force Base Officers' Club on 22 June 1960, at the time of Major General Marold E. Watson's transfer to other duties. Guests included the Corps of Air Attaches.

Farewell Luncheons: Farewell luncheons were given by the Assistant Chief of Staff, Intelligence, for the following Foreign Air attaches on completion of their tour of duty in Washington:

Major General Jean M. Bezy, France
Major General Earon A. Del Marmol, Belgium

Colonel Amarn Yariv, Israel

Group Captain feith S. Hennock, Australia

Yayor assan Buscafa Nakio, Iraq

Colonel Othar T. Engvik, Norway

Newly Accredited Accaches:

The following Accaches were accredited to the mitted States Air Force during the period January - June 1930:

Air Lesacrest

Colonel Toussi Polanov CHISTON Talparia:

Cala: Major Jose MOLEON

Major Ceneral Henri de MANCOURC Francet

G. Pritain: Air Vice Marshal Walter C. SHEEM

Colonel Yelada AFE AF Israel:

Tew Mealand: Wing Contander John . CLAYDON

Lt Ceneral Frans J. DURMIAUX elgir:

Lt Colonel Nobammed T.ALID Irag:

Assistant Air Attacles:

Ar encinat Lt Colonel Carlos F. PELMYRA

Group Captain W. C. VAN CAMP Group Captain T. G. RICHARDS Canada:

Bulgaria: Major Tamen D. PETPOY

Lt Colonel J. KACZOREK loland:

furkey: Major furgat YAZGAN

Colonel Alexander P. AFARINOV USSR:

# (U) Information Granch, International Liaison Division

(Uncl) puring the reporting period, 5,033 individual requests for release of military information were processed, resulting in 2,270 individual actions.
